MEMORANDUM

TO: Donald C. Norseth, Distribution Engineer  
Richard R. Pexton, Accountant

FROM: Gerald W. Stoker, Area Engineer

RE: Alvey Wash Distribution System

We recently received the distribution records from the Alvey Wash Water Commissioner, Mr. Melvin Alvey, concerning the administration of water rights in this area of Garfield County, Utah. In reviewing the records it is noted that the supply of water was apparently normal for Alvey Wash and that there were no problems encountered during the irrigation season.

During an inspection of the system on May 22, 1974, we recorded the following information: Leo Wilson was receiving 57.1% of his decreed right, Thurman Spencer, by utilizing his sump pump, was using 19.3% of his decreed right, McKay Bailey had 0.33 CFS measured onto his farm, Mary Steed was diverting 0.92 CFS or 100% of the 0.50 CFS right and 56% of the 0.75 CFS right, and Mr. Vay Barney was not diverting water, although there was water in the channel.

The following is a breakdown on water useage for the 1974 Irrigation Season:

<u>Water User</u>	<u>Acre Feet Allowed</u>	<u>Delivered</u>	<u>% of Total</u>
Paul Steed Estate	180.00	251.63	40.06
Thurman Spencer	81.90	27.73	4.41
Leo Wilson #2	183.30	9.62	
#3		256.53	42.37
McKay Bailey	75.00	82.66	13.16
Total	734.70	628.17
